First, on the urban level, our strategy is proposing an urban conservation scheme that reconfigures the open spaces.

Second, on the buildings level, we are suggesting a typological reconfiguration - adapt existing buildings, and build new affordable housing units.

Third, on the social level, our intention is to conserve the social mixity (class, nationality, status) of the alley to preserve this mixity we are going to create a platform that acts as a dynamic generator at the socio-economic level.
Residential layer

Public spaces layer

1. Public spaces 'ground zero'
   Alley's network of public spaces, furnished with basic, archetypal elements

2. Connections through opening buildings' groundfloor

3. Public spaces at a wider scope, that potentially spreads from an area to the other

The catalyst

1. Obtainability criteria urban intervention
   and regeneration through a neighborhood third space
   Rino Pani, 1976

2. Kyhniado beach (Aegean) self-built
   migration with modest
